

LAND SURVEYING

Statement of Qualifications

INTRODUCTION

GIS Surveyors Inc. (GSI) is a multifaceted geospatial firm specializing in land surveying, utility locating, geographic information systems (GIS), and LiDAR. We combine the core aspects and precise measurements of a land surveying company with the geospatial analysis of a GIS firm. This is the key reason GSI receives the most complicated land survey requests from the utility, transportation, and land development industries.

As a veteran- and employee-owned firm, GSI retains top-quality land survey talent. We have tripled in size since our 2013 opening with three offices throughout the western seaboard - San Diego, Los Angeles, and Seattle. Our highly experienced workforce has a strong work ethic that leverages the finest land survey technology to produce limitless client solutions.

Our team has decades of land survey experience with in infrastructure projects, including, powerlines, solar, highway, water and sewer, gas, and is made land survey crews including licensed Professional Land Surveyors (CA), Land Surveyors in Training, Professional Civil Engineers, Utility Locating Specialists and Federal Aviation Administration-certified Unmanned Aerial Systems pilots.

In addition to the varied project work we undertake, our firm has extensive experience in providing on-call land surveying support and we currently have on-call contracts in place with Southern California Gas (SoCalGas), San Diego Gas and Electric (SDG&E), Southern California Edison (SCE), City of Yorba Linda, City, County and Port of San Diego, Housing Authority of the City of Los Angeles and US Army Corps of Engineering (USACE). Our clients rely on us to get the job done safely, effectively and to the highest possible standard.

SURVEY TEAM STRENGTHS

- Proven Track Record** History of completing projects within cost, quality, and time requirements.
- Best Industry Equipment** Top land survey technology ensures high-quality deliverables, like with our multiple drones, Trimble SX10 Scanning Total Station, and Trimble R12 RTK GPS.
- Safety Always First** Use of remote sensing acquisition techniques keeps the team safe. We train regularly on the latest safety measures, requirements, and effective reporting.
- Proven Experience** Strong company culture and reputation retains top technical talent that spans multiple industry segments.
- Industry Best Practices** Clients lean on us to demonstrate and often train them on best practices. The result is streamlined operations and the highest quality products.
- Rigorous QA/QC** Ensures all deliverables surpass client expectations.

Key Competencies

- Geodetic Control
- UAV/UAS Mapping
- Boundary Surveys
- ALTA Surveys
- As-Built Surveys
- Legal Descriptions
- Topographic Surveys
- CADD Automation
- Right of Way Engineering
- Utility Research, Locating & Mapping
- Exhibit Maps
- High Definition Scanning

SERVICE-DISABLED VETERAN OWNED BUSINESS

A MULTIFACETED GEOSPATIAL FIRM

WHO WE ARE

What makes GSI different from other geospatial firms is our expertise in the top four services our industry requires to be successful: Land Survey, GIS, LiDAR, and Utility Locating for both national and international clients. This allows us to streamline projects in the most efficient way. Our employee-owned firm attracts the expertise to seamlessly deliver the most innovative geospatial services to our clients.

GIS SERVICES

- Digitizing
- Spatial Analysis
- 2D/3D GIS Modeling
- Geodatabase Design/Creation
- Data Conversion
- FME/ETL Process Workflows
- PLS-CADD/LiDAR Conversion
- Data Migration
- Needs Assessment
- Program Development
- Web Based GIS Mapping
- Programming

LAND SURVEYING

- Geodetic Control
- UAV/UAS Mapping
- Boundary Surveys
- ALTA Surveys
- As-Built Surveys
- Legal Descriptions
- Topographic Surveys
- CAD Automation and Consulting
- Right of Way Engineering
- Utility Research & Mapping
- Exhibit Maps
- High Definition Scanning

LiDAR

- LiDAR Capture
 - Airborne (fixed wing, helicopter, UAV)
 - Mobile
 - Terrestrial
- LiDAR Classification
- Ortho Rectification
- Planimetric Mapping
- Building Information Modeling
- 3D Models
- PLS-CADD Modeling

UTILITY LOCATING SERVICES

- Subgrade Utility Locating
- Ground Penetrating Radar
- CCTV Inspections
- 811 Mark-out QA/QC
- Pothole Surveys
- Utility Conflict Mapping
- S.U.E. Engineering Support
- Drone Inspections
- As-built QA/QC
- Utility Records Research
